Whichever method you select, it only takes a matter of minutes to get your Verizon phone activated.. Then you can call your friends and tell them all about it To activate a Verizon phone, you'll need:

- Computer with internet connection (to activate by computer)
- A My Verizon account (to activate by computer)
- A Verizon Wireless cell phone
- Any phone line (to activate by phone)
- A Verizon Wireless store or kiosk (to activate in person)
- If you're currently a Verizon Wireless customer, back up the contacts on your old phone before you activate your new phone.

Enter your phone's ESN number in the appropriate box, then click 'Continue ' If you're prompted to enter your order number or the last four digits of the account holder's social security number, do so, and click 'Continue.. Once your new phone is activated, you can use Backup Assistant to quickly sync this information..

- Assemble all the information you'll need to activate your Verizon phone Locate the phone's ESN number, which is found by removing the battery and looking at the label beneath it.. You can do it for free using the Verizon Wireless website, your cell phone handset, or pay for a customer service agent to do it for you over the phone or in the store.. The ESN is either an eleven number in decimal format or an eight digit combination of letters and numbers in hexadecimal format. [Download Driver Canon Pixma Ip1980 For Win7](#)
